Description / Action:
 - Preliminary issue of dwg to allow manufacture of D3624-2 Bubble Window. A tool needs to be created to define the shape of the window, so we can have a consistent shape. DS suggested it could be plywood cut with the bubble window profile.
 - Part number should already be in the system, as we've made prototypes. We should make qty(1) of the bubble window before large prod. run and verify shape and do an FAI.
